

The World's first Touch panel control Power supply!

Power Supply High Current/ Voltage type

『WSE-3100 Power Station Ghibli I』

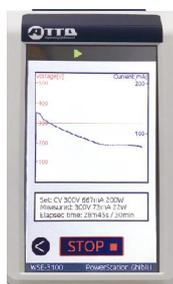

Easy operation !

- **The world's first touch panel control power supply! For electrophoresis and blotting**
Easy setting with tapping screen.
- **Large LCD display**
Preset value, output value, timer are easy to control on color screen.
- **Broad output range**
Voltage 0-500V, current 0-3000mA.
Available with high speed electrophoresis and high speed blotting.
- **Simple operation**
Manual mode:
Only to input current (or voltage) under constant current (or voltage) setting.
Method file mode:
Select condition from saved file list.
Easy mode :
Select from intended application; SDS-PAGE, blotting etc.
- **Other functions**
Save 20 files, 9 steps/file Detect an error with display on screen, alarm notice
Graph display of actual output values
Power fail recovery function

Output

WSE-3100 PowerStation Ghibli I	2311130
Setting	Voltage 3-500V Current 10-3000mA Power 1-200W
Output range	Voltage 0-500V Current 0-3000mA Power 0-200W
Timer	1-999min, Timer ON/OFF
Display/operation	7 inch color screen touch panel
Operation	Constant current, Constant voltage, Constant Power Manual mode, Method file mode, Easy mode, 20 files available, 9 steps/file
Safety	Detection of error (open circuit, short circuit, sudden load variation etc.), Alarm
Other functions	Pause, Graph display, Power fail recovery ON/OFF
Input	AC100-240V, 50/60Hz
Dimensions/Weight	119(W)x417(D)x224(H)mm/ 6kg
